

## Bug Report

Document each bug found in the following format:

Bug Name:	
Description:	
Test Case:	
Location of error:	

### Example:

Bug Name:	Factorial result incorrect
Description:	The factorial method appears to compute the factorial of 1 number lower then itself. E.g. 5! Results in 24 rather than 120.
Test Case:	TestFactorialValidNum()
Location of error:	Calculator class, factorial method

### Report:

Take a screenshot showing your test cases, and if they passed or failed.
